## DETAILED ACTION

### *Double Patenting*

Claim 4 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 3. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3,4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #4,769,526 to TAOUIL. TAOUIL discloses a molded gutter section (16) including a liquid passage (LP), see below, and an air flow passage (32) adjacent

thereto. In reference to claims 3,4 and 6, the air flow passage comprises multiple linear air flow passages (32).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #4,769,526 to TAOUIL. As detailed above, TAOUIL discloses the basic claimed gutter except for explicitly detailing non-linear air flow passages. The applicant has shown no criticality in linear and non-linear air flow passages, and as such, linear air flow passages are art recognized equivalents to non-linear air flow passages. Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to select either linear or non-linear air flow passages whichever is suitable for the use intended as an obvious matter of design choice.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #4,769,526 to TAOUIL. TAOUIL discloses a gutter system including a first molded gutter section (16) including a liquid passage (LP), see above, and an air flow passage (32) adjacent thereto. TAOUIL discloses the basic claimed system except for explicitly detailing the use of second and third gutter sections. Although TAOUIL is silent in this regard, it would have been obvious to one having ordinary skill in the art at the time the invention was made to form that which may previously have been known and as a single or integral product in to several pieces involves mere routine skill in the art. For instance, it would have been obvious to a person skilled in the art to form perhaps a piece of gutter section for the length and another for the width of the structure that the gutter is being attached thereto.

#### ***Allowable Subject Matter***

Claims 2 and 8-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
